

## Ultra V Series® and UltraMate®

The Gorman-Rupp Ultra V Series® with UltraMate® pump is specifically designed for handling solids and slurries. They have significantly higher head capabilities than Super T Series® and 10 Series® pumps. If a clog occurs, it can be removed easily through the coverplate opening without disturbing piping or using any special tools.

### Specifications

Size	3" (80 mm), 4" (100 mm), 6" (150 mm)
Min Capacity	10 GPM (1 lps)
Max Capacity	1900 GPM (120 lps)
Min Head	10' (3 m)
Max Head	325' (99 m)
Max Solids	3" (76 mm)
Materials of Construction	Cast Iron, CD4MCu, Stainless Steel

### Features

#### Extended Versatility for Enhanced Performance

The "VS" version of these pumps can be used when system requirements exceed the Ultra V Series exceptional performance range. By mounting our UltraMate unit directly to the Ultra V through an innovative transition chamber, maximum pressure is increased up to three times the traditional solids-handling self-priming single stage pumps. Losses associated with conventional series connected pumps are also reduced, resulting in increased efficiencies.

The UltraMate unit allows for a variety of discharge positions. This "smart scroll" feature offers installation flexibility. This vertically staged assembly also reduces the footprint required with conventional staging configurations.

The rotating assembly and the back cover plate are interchangeable between the Ultra V and the UltraMate, reducing spare parts inventory.
